

The 45-Day Search Playbook

How BEG fills permanent roles in 23-35 days, step by step.

About BEG

BEG places permanent hires in 23-35 days at roughly 50% less than contingency, with an 86% fill rate and a 45-day replacement guarantee. We are a milestone-based placement service, not a staffing agency.

Why most searches stall

The strongest candidates are employed, passive, and rarely on job boards. Their window to consider a move is two to four weeks. A search built on posting and waiting misses them every time. The fix is direct sourcing plus speed, with incentives aligned to your timeline rather than a single contingency payday.

The BEG method, by week

Stage	When	What happens
Discovery call	Day 0	We align on the role, the must-haves, and the comp range. 15 minutes.
Active sourcing	Days 1-10	We go direct to passive candidates who fit, not job-board applicants.
Shortlist review	Days 10-18	You receive 3 to 5 pre-screened candidates, not a stack of resumes.
Interviews	Days 18-30	You meet qualified people only. We manage scheduling and feedback.
Offer and close	Days 30-35	We help structure the offer and keep momentum through the close.
Guarantee	45 days	If the hire does not work out in 45 days, we replace at no charge.

Why it costs less

- Milestone billing replaces the standard 20-25% contingency fee. Total cost is roughly 50% less.
- You pay across defined milestones, not one large invoice on placement.
- Aligned incentives mean we move on a targeted shortlist, not high-volume resume blasts.

What to have ready

- A clear role profile and the 4 to 6 must-haves that actually matter.
- A realistic comp range for the market and seniority.
- A fast interview process: two rounds, decisions within a few days.
- An internal decision-maker who can move when the right candidate appears.

Ready to fill the seat?

Hand the role to BEG and we fill it in 23-35 days at roughly 50% less than contingency, with a 45-day replacement guarantee.
